

PROSHOT™

DRY DRILLING FLUID POLYMER

DESCRIPTION

PROSHOT is an easy mixing, water soluble, polymer used in horizontal and vertical drilling applications.

RECOMMENDED USE

For use in a variety of soils types. Use as a stand alone additive or in combination with SUPER GEL-X® or HYDRAUL-EZ®.

CHARACTERISTICS

- Eliminates clay and shale swelling, bit balling, and sticking problems
- High lubricity reduces torque
- Increase rate of penetration
- Inhibit sticky clay from swelling
- Quick Mixing and rapid yield in freshwater or saltwater
- Stabilizes the borehole while boring

MIXING AND APPLICATIONS

Clay and Shale Formations

2.5 – 3.0 lbs/1,000 gals for freshwater

1.0 – 2.0 lbs/1,000 gals for SUPER GEL-X and HYDRAUL-EZ systems

Sand and Coarse Formations:

4.0 – 5.0 lbs/1,000 gals for freshwater

2.0 – 4.0 lbs/1,000 gals for SUPER GEL-X and HYDRAUL-EZ systems

PACKAGING

6-7.5 lb jugs per case, 18 per pallet. All pallets are plastic-wrapped.
